Address: District Charsadda Village Dosehra, Mohalla Waheed Abad Dosehra, 24420, Charsadda, Pakistan (Home)

ABOUT ME

Computer Science student with a strong foundation in Python, Java, and C++. Interested in software development, AI, and cybersecurity. Passionate about solving complex problems, building efficient solutions, and contributing to impactful projects. Actively participates in hackathons and coding challenges to enhance skills and stay updated with emerging technologies.

EDUCATION AND TRAINING

01/09/2023 – CURRENT Mardan, Pakistan

BS COMPUTER SCIENCE Abdul Wali Khan University Mardan Pakistan

Website https://news.awkum.edu.pk/ | **Field of study** Computer use | **Level in EQF** EQF level 5

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	C2	B2	B2	C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Microsoft Office | Microsoft Powerpoint | Microsoft Excel | MySQL | python | C++ | python Libraries | WordPress | n8n | AgentKit | HTML | Java | JavaScript | CSS | Microsoft Access | Machine Learning | Artificial Intelligence

Database Structures and Management with MySQL

This course introduces the fundamentals of database management systems (DBMS) with a focus on MySQL. Learners will gain practical skills in creating, querying, and managing data using SQL. The curriculum covers key DBMS concepts such as RDBMS, keys, normalization, and essential MySQL commands for filtering, joining, and grouping data. By the end, participants will be able to design and manage effective database structures using MySQL.

Foundations: Data, Data, Everywhere

“Foundations: Data, Data, Everywhere” is an introductory course that explains the basics of data, how it is collected, organized, and used to make informed decisions. It teaches essential concepts of data analysis, data types, data tools, and the role of a data analyst in modern industries. The course is designed for beginners and helps build a strong foundation for starting a career in data analytics.

Introduction to HTML, CSS, & JavaScript

“Introduction to HTML, CSS, & JavaScript” is a beginner-friendly course that teaches the core building blocks of web development. It covers how HTML structures a webpage, how CSS styles and designs it, and how JavaScript adds interactivity and dynamic behavior. This course provides a strong foundation for creating modern, responsive websites.

ARTIFICIAL INTELLIGENCE (ML/DL)

“Artificial Intelligence (ML/DL)” provides an introduction to modern AI with a focus on Machine Learning and Deep Learning. The course covers core concepts, algorithms, and model-building techniques used to train intelligent systems. Learners gain practical experience in data processing, model training, evaluation, and real-world AI applications.

Mode of learning: Work based
